

OST PARTNERSHIP

September 8, 2008

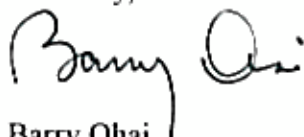

To Sonitrol Pacific:

I would like to take the time to personally thank Sonitrol Pacific for providing solutions that resulted in the recent apprehension of two burglars here. We have had several break-ins over the past six months and when I called for help, your Customer Service Representative, Heather Orso, came right down to see what your Company could do for us. Heather was friendly and knew just what to suggest. We implemented some of her suggestions, along with video alarm monitoring of our premises.

Yesterday, those suggestions paid off. Sonitrol's monitoring center dispatched the Seattle Police Department to a verified alarm here at OST Partnership. The operator monitoring our account was able to tell the police dispatcher that she saw two males pry the front double doors open and could see them inside the building. Because it was a verified alarm, the Seattle Police department was able to respond immediately. They apprehended two males that had loaded up laptops, computers, and monitors, and were ready to leave the scene.

The officers that responded made it a point to come and thank me for having a Sonitrol silent alarm system because of the benefit to them. They said silent technology gives them the valuable time they need to catch criminals in the act. We here at OST Partnership are so glad to have a security company that really does what they say they will do. I can confidently recommend Sonitrol Pacific due to their superior product and outstanding level of customer service.

Sincerely,

Barry Ohai
President
OST Partnership
