

December 31<sup>th</sup>, 2008

To Whom It May Concern:

On December 18<sup>th</sup> two men broke into our offices at Diversified Recycling Center in Everett. We had cash in two separate safes and they were able to break open one of the safes and take the cash, but the other safe was sturdier so they were not able to get it open. They tore down two of our outdoor surveillance cameras and also took power tools. They had punched a hole in our sheet metal siding to pass through the stuff they were stealing. What those two guys didn't know was that Sonitrol had already heard all the noise they were making and had called police! We had a lot of snow on the ground which must have made those two think they would have a better chance of getting away but the Everett Police surrounded the building and captured both of them and we were able to recover most of what they had tried to take. We think we may find more of our missing items once the snow begins to melt.

This could have turned out much worse if we had not had Sonitrol listening in on the commotion these two were creating due to the fact that they did not use a door to enter our building and did not cause an ordinary alarm. They had cut a hole in the glass of a window and reached through to open it and climbed through. This is not the first time Sonitrol has sent police to our building with sounds of someone trying to get in. We're especially pleased with this apprehension as it would have been quite a shame to lose all of our tools and computers as well as our working cash. We have always felt well protected with Sonitrol and whenever there have been any issues Sonitrol has always stepped up to the plate and provided great service. We're happy to recommend Sonitrol to anyone looking for the best alarm system available!

Sincerely,

Neil Hunt
